Initial treatment session

A physical therapeutic condition is discovered at the first treatment session. Based on an interview and different tests the individual problematic nature of your condition is checked. This is of great importance for the progress of the treatment and to set up the goal together. Depending on the complexity of your condition this could take up the entire first session.

Duration of the therapy session

I plan a half hour's time per patient. Along with the scheduling of the next appointment, the cleaning up and the recording of the progress record, the treatment time is ca. 25 minutes. With special treatment techniques the therapy can last between 45 and 60 minutes.

Cancellation of an appointment

If you must cancel or postpone an appointment, call 24 hours ahead of time please. There is a possibility to take on another patient and there is no cost to you. If you cancel the appointment too late or it is considered unexcused, you will be charged the fee for the appointment.

Extension of the treatment series

If the therapy is to be continued beyond the first series of treatments it is necessary for you to get a new order for treatment from your doctor. After termination of the therapy, your physician receives a report on the therapy result.

Invoice

At the end of your therapy you receive an invoice. Pay this fee to me directly. Send the invoice copy to your health insurance.
